

- A team of experienced project engineers will take responsibility for the practical fulfilment of your entire project.
- FMB project management uses modern management tools to provide a comprehensive servicespackage, including:
 - Planning and coordination
 - Contract management
 - Financing
 - Quality management
 - Progress control
 - Reporting
- We also incorporate the services of external consultants and institutions for selected project tasks.
- As a means of extending and further complementing our own scope of performance, we enter targeted alliances and partnerships with other firms who can be usefully integrated into our projectmanagement work.
